

I have been an Amateur Radio Operator for almost 10 years.
I have been a Technician No Code all that time. I'm looking forward to being upgraded to a General Class under RM-10867.

I agree with RM-10867 submitted by the ARRL, but would request some additional items to RM-10867.

1. A test required for upgrade from Technician to General class.
2. This test must have a strong emphases on High Frequency theory and operations.
